

Complete dormant entity solution

The local business environment in Russia is quite challenging for international companies. Economic sanctions have forced multinationals to wind down local operations and start liquidation of local subsidiaries. Under the current circumstances, liquidation might be more complicated and it is highly probable to attract the attention of local regulators and cause a tax audit.

As an **alternative option**, companies take a decision to transfer the local activity to the minimum level and stay in a **dormant status for the interim period**. Be aware that have a dormant status does not release an entity from the compliance obligations and statutory reporting fillings even in the absence of operational activity.

Our **ONE STOP SHOP** solution covers all major compliance areas and enables the retention of a dormant local entity for the interim period*.

Requirements	ONE STOP SHOP solution for the interim period
Presence of Director with direct employment by the local entity	Directorship services under the full supervision by the Parent company
Availability of a registered address	Domiciliary services, maintenance of post-mails
Statutory reporting on a quarterly basis	Submission of all mandatory fillings
Payment agent services	Payments processing from ABU bank accounts to the third parties: vendors, tax authorities, social funds, etc.

** In addition, we would be happy to discuss other ABU services, such as company liquidation.*
